

ROOTED IN *Nature*
PERFECTED THROUGH EXPERIENCE

RAMA NATURE WORKS • UDAIPUR • INDIA

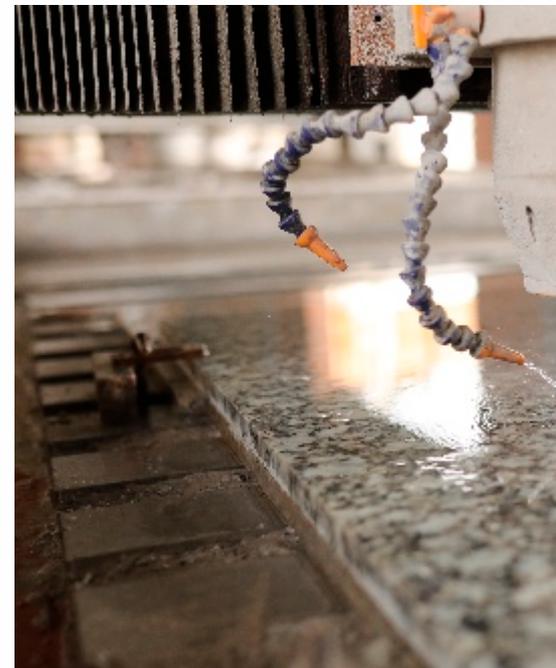

ABOUT US

Based in **Udaipur, Rajasthan**, Rama Nature Works is one of **India's leading natural stone companies**, delivering world-class marble and engineered stone solutions. Our presence spans the **entire value chain — from quarrying and global sourcing to processing and precision fabrication**.

We work with **10+ quarry partners across 10+ countries**, including Italy, Turkey, Vietnam, Brazil, and Spain, offering a curated portfolio of **Indian, imported, and exotic stones** with complete control over quality and consistency.

With **20+ years of experience, 50+ stone varieties**, and advanced CNC capabilities, we partner with architects, designers, and developers to deliver stone solutions that combine **natural beauty with technical accuracy** across India and global markets.

OUR QUARRY

“
Crafted by nature.
Perfected by precision
”

We operate two exclusive marble quarries — **Cherry Gold** and **Royal Black** — recognized for their exceptional quality, uniform colour, and long-term durability. Each quarry is managed using advanced extraction and quality-control techniques, ensuring a consistent supply of superior stone blocks for architectural and large-scale applications.

SOME PROJECTS

4th Dimension Associates | Ar. Mihir Kotak

We delivered pre-assembled, numbered mosaic flooring slabs that were processed off-site and installed directly, ensuring digital precision and seamless execution.

Third Space by Secure Meters

We processed over 1,200 precision slabs using 3-axis CNC technology and engineered the full installation system in-house, including anchoring, joint detailing, and layout logic.

Ar. Shaunak Singh & Associates

We executed a complete Beige Travertine façade system with integrated Grey Marble flooring, delivering precise detailing, engineered anchoring, and controlled installation.

A U.S.- Based Builder

We delivered 4,700+ customized countertops and vanities, pre-polished and ready to install, with four containers shipped every month without delay. An end-to-end pipeline was built — from block cutting to polishing, edge finishing, packaging, and AutoCAD-based layout mapping — ensuring zero on-site errors.
